01/26/2026	I tasked to create structured **IsCoreQuiz.**	I'm experiencing a bit of a learning curve because im Newbie to use react.js and node.js, this is my first time using it	Creating around three distinct user tiers. The system features a **centralized Admin** who manages accounts and links students and faculty to specific subjects. **Faculty** create quizzes that are automatically pushed to their enrolled classes, while **Students** receive a personalized dashboard of active assessments for a seamless, automated experience.	8 hrs.	Leaving my comfort zone is a high-stakes gamble with high rewards. Today was a massive win—I expanded my skills from PHP to cross-platform development and learned more than I ever expected.
01/27/2026	I tasked to create structured **TabulatorX.**	The Formula of scoring.	Create a secure tabulation system that prevents manipulation. It will include an automated ranking feature that calculates positions based on specific weighted criteria.	8 hrs.	I mastered the system logic quite easily using PHP. Completing the project was incredibly rewarding, as I gained a lot of valuable experience.

01/28/2026	Structured and Organized the **COM LAB RFID Atttendance Monitoring System**		I'm organizing the system into specific folders for Admin, Faculty, and Students. Aligning them with **src_db** makes the architecture cleaner and much more stable.	8 hrs.	Keeping the momentum going! Another solid day with so much learned.
01/29/2026	ADDED FEATURES TO **TABULATION X**, **COM LAB RFID Atttendance Monitoring System**		I've implemented all the feedback from the Dean and the PM, ensuring the project aligns with their specific requirements.	8 hrs.	I've had so many breakthroughs and key realizations today. It's been an incredibly productive day for my development.
